## **DETAILED ACTION**

### ***Status of the Application***

Claims 1-20 are pending.

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4, drawn to a nucleic acid molecule encoding an engineered protein having altered amino acid composition, classified in class 536, subclass 23.1.
  - II. Claims 5-20, drawn to plants and seeds comprising a nucleic acid molecule encoding an engineered protein having altered amino acid composition, classified in class 800, subclass 295.

The inventions are distinct, each from the other because of the following reasons:

2. Groups I and II each comprise a chemically unrelated structure capable of separate manufacture, use, and effect. The DNA in Group I comprises a nucleic acid sequence whereas the transgenic plant/seed in Group II is a multicellular organism. The DNA has other uses besides being introduced in the transgenic plant of Group II, such as a hybridization probe or in the production of the corresponding protein. The transgenic plant of Group II can have other uses such as to produce specific compounds which are naturally found in such plant and/or fruit, if it is a fruit-bearing plant, besides manufacturing the protein of Group I.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1652

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement can be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Applicants are requested to submit a clean copy of the pending claims (including amendments, if any) in future written communications to aid in the examination of this application.

7. Certain papers related to this application may be submitted to Art Unit 1652 by facsimile transmission. The FAX number is (703) 308-4556. The faxing of such papers must conform with the notices published in the Official Gazette, 1156 OG 61 (November 16, 1993) and 1157 OG 94 (December 28, 1993) (see 37 CFR 1.6(d)). NOTE: If Applicant submits a paper by FAX, the original copy should be retained by Applicant or Applicant's representative. NO DUPLICATE COPIES SHOULD BE SUBMITTED, so as to avoid the processing of duplicate papers in the Office.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Delia M. Ramirez whose telephone number is (703) 306-0288. The examiner can normally be reached on Monday-Friday from 8:30 AM to 5:00 PM.

Art Unit: 1652

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dr. Ponnathapura Achutamurthy can be reached on (703) 308-3804. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
